My Portfolio Site - galuszkagraphics.net

PROFESSIONAL EXPERIENCE

I maintain advanced knowledge of Adobe Creative Suite CC (Photoshop, Illustrator, After Effects, InDesign, Adobe Xd), Sketch for Mac and Microsoft's Office (PowerPoint, Word, Excel). My design career started in Chicago at Spiegel catalog composing layouts for print. Over the years working at creative agencies I have become proficient in responsive front end coding to be a greater asset to the company. I also have experience in creating motion graphics for promotional videos. I see video messaging as the most effective way to reach a potential customer. I enjoy brainstorming meetings and working with writers as a creative resource. This resource energizes the design work that leads to the finished product. I look forward to showing my portfolio and discussing how I can be a valuable member of your team.
